Claims 25-58 are presented for examination.

The amendments and remarks filed on October 17, 2003 have been received and entered.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 58 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claimed invention is directed to a method for treating retinopathy or age related macular degeneration using a NAALADase inhibitor. The specification discloses examples of structures of some compounds within the scope of what is claimed. However, there is no evidence that there is any per se structure/function relationship between the disclosed NAALADase inhibitor compound and any others that might be found using the claimed method. Structural identifying characteristics of group of NAALADase inhibitors are not closed. Therefore, the claimed invention is not supported by adequate written description.

Claims 25-57 at present time are considered to be allowable.

The newly submitted claims necessitates the new ground of rejection

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
